Winding up the workshop

Kjeld Rasmussen

What did we do ?

To refresh your memories:

- Contemporary approaches to Land Systems Science
- Interdisciplinarity in Land Systems Science: Different cultures, agendas, success criteria, mutual interactions & meanings
- Strategic management goals and valuation of landscapes

What will we do ?

- In an international context: This session
  - Global Land Project
  - At European scale
- In a Danish context: Next session

The international / European context

Trends in – and opportunities for – research (and education) in Land Systems Science in Europe, as well as outside Europe yet involving European researchers

- Upcoming themes, some examples:
  - Impacts of the global increase in demand for meat
  - Impacts of climate change
    - Direct
    - Indirect: The bio-fuel boom, Carbon sequestration
  - Impacts of changes in valuation of ecosystem services
- Upcoming opportunities
  - 7th FP, ERC
  - GLP
  - Joint European activities in both education and research in Land Systems Science in developing countries
